

## Firelogue WG Suggestions & Policy Coherence workshop 2024

**Purpose:** Synthesis and fine-tuning of policy suggestions for enhanced wildfire risk management; ensuring coherence of suggestions with existing and envisaged policies

**Scope:** Day 1: Firelogue internal workshop (WG Leads, FhG, TRI, potentially PCF) → about 8 people

Day 2: Exchange with relevant experts from the policy side (DGs, Lobby groups, etc.) → max. 20 persons.

**Dates:** 27<sup>th</sup> and 28<sup>th</sup> of November 2024

**Location:** Fraunhofer Office, Rue Royale 94, 1000 Bruxelles, Belgium

### Day 1 (27<sup>th</sup> November): Synthesising and fine-tuning of suggestions

**Time:** 9:30 – 16:30

Building on the Solsona and Nea Makri workshops as well as initial (online) discussions, the 1-day workshop aims to synthesise and fine-tune the policy suggestions that Firelogue aims to draft. At the end of the day, each WG should have a short list of suggestions incl.

- the next steps for making them actionable
- the potential timeline and effort
- the relevant stakeholders

The results of Day1 will provide the grounds for Day2 and the exchange with policy makers.

### Day 2 (28<sup>th</sup> November): “Reality check” and Policy coherence

**Time:** 10:00 – 14:30 (for the guests and potentially 1,5 hours to re-cap with the partners)

The second Day aims to present the initial suggestions to the policy makers in order to collect feedback and suggestions and to ensure coherence with existing and planned policies. Ideally, each WG would invite 2 representatives from the policy side. After an introductory presentation by the WGs, participants would be asked to work on a number of questions individually/in pairs with the aim to:

- Sketch potentially missing links with existing/planned policies
- Assess the suggestions in terms of their feasibility & aspects to consider
- Collect additional suggestions/thoughts on the draft suggestions
