Miguel Ángel Blanco Rodríguez
Doctor Combelles 48, 7^o2

Object: Internship in forest ecology

Madam, Sir,

I hereby confirm the arrival of Mr. Miguel Ángel Blanco Rodríguez as an intern as part of his studies in our forest ecology research laboratory from July 26th, 2025, to November 20th, 2025. Our laboratory is part of a major interuniversity research center, the Centre for Forest Research, and is located at the Université du Québec à Montréal (UQAM, SB-2665, Department of Biological Sciences, 141 Président-Kennedy, Montréal (Québec), H2X 1Y4 Canada) (National Occupational Classification code: 41201).

As part of his internship, Mr. Blanco Rodríguez will work on globally analyzing patterns and drivers of post-fire recovery using remote sensing data. Thus, he will focus on compiling a large global remote sensing database to obtain information on post-fire vegetation recovery. Last, he will conduct analyses of the factors that mediate post-fire vegetation recovery at a global level according to the biomes studied. This visit will take place in the UQAM under my guide.

Please do not hesitate to contact me if you have any questions.

Best regards,

Christian Messier
